ADVANCED TRAUMA LIFE SUPPORT

Sponsored by:

South Dakota ATLS Task Force

Co-sponsored by the
South Dakota Committee
on Trauma

COURSE OBJECTIVES

Upon completion of the ATLS Course, the participant will be able to:

- I. Demonstrate concepts and principals of patient assessment.
- II. Establish and manage priorities in a trauma situation.
- III. Initiate primary and secondary management necessary within the first hour of emergency care for acute life-threatening emergencies.
- IV. Demonstrate the skills necessary in initial management of trauma victims.

The patterns of severe trauma, as with acute critical illness, are greatly influenced by the judgment exercised by you on initial contact with the patient. Knowledge of the type and nature of the injury and organ involvement will facilitate your initial assessment of the patient. This primary assessment may be futile if measures are not immediately instituted to prevent further injury.

LECTURES

- ❖ Initial Assessment
- ❖ Airway Management
- ❖ Shock Management
- ❖ Thoracic Trauma
- ❖ Abdominal Trauma
- ❖ Extremes of Age
- ❖ Head Injury
- ❖ Spinal Cord Management
- ❖ Burn Management
- ❖ Fracture Management
- ❖ Pediatric Management
- ❖ Stabilization and Transport

Skill Stations

- ❖ Surgical Skills
